OPERATOR TRAINING PROGRAMS

Our operator training programs provide the skills needed to safely and efficiently operate forklifts, mini excavators, skid steers, MEWPs, Shuttlewagon rail car movers, and Terberg terminal tractors. Combining classroom instruction with hands-on practice, participants learn operational techniques, safety protocols, and risk assessment. We focus on equipment functionality, workplace safety, and best practices to develop confident operators who prioritize safety and efficiency.

Contact for pricing and availability

Cancellation & Rescheduling Policy:

Cancellations or rescheduling requests must be made at least 48 hours prior to the scheduled training start time. Failure to provide sufficient notice will result in a \$300 cancellation/rescheduling fee.

*A minimum of five students is required per training session. Additional students will be charged at the specified additional student rate.

** An additional fee applies for students training in multiple classifications.

TRAIN THE TRAINER PROGRAMS

Our Train the Trainer programs equip individuals to teach and certify operators through instructional techniques, safety regulations, and hands-on training. Participants learn to lead engaging sessions, assess competency, and promote workplace safety, ensuring they develop skilled, safety-conscious operators.

AVAILABLE PROGRAMS & CLASSIFICATIONS

TRAINING CLASSIFICATION

Forklift Operator Training Course

This course is designed to qualify individuals to operate a forklift safely and efficiently.

MEWP Training

This course prepares individuals to operate Mobile Elevated Work Platforms (MEWPs) safely. Training includes a classroom presentation on safety principles and equipment components, followed by hands-on operation.

Recertification

This 2-hour course is for operators who need to renew their forklift and MEWP certification.

Classes 1, 4, and 5

Electric and Internal Combustion Engine Trucks Covers electric motor rider trucks (Class 1) and internal combustion trucks with cushion or pneumatic tires (Classes 4 & 5).

Class 2

Electric Motor Narrow Aisle Trucks Designed for tight spaces, this category includes reach trucks and order pickers, commonly used in warehouses with narrow aisles.

Class 3

Electric Motor Hand or Hand-Rider Trucks Includes pallet jacks and walkie stackers, primarily used for ground-level loading and unloading in warehouses and distribution centers.

Class 7

Rough Terrain Forklift Trucks
Built for off-road use, these forklifts have large tires for stability on uneven surfaces, making them ideal for construction and agricultural applications.

Mobile Elevating Work Platform (MEWP)

Training covers the safe operation of aerial lifts, including scissor lifts (1A/3A) and boom lifts (1B/3B).
